

Foreclosure Sales Nearly Double from Prior Year

Despite Jump in Sales, Foreclosure Delays Remain at Record Levels

Discovery Bay, CA, April 13, 2010 - ForeclosureRadar (www.foreclosureradar.com), the only website that tracks every California foreclosure and provides daily auction updates, issued its monthly *California Foreclosure Report* for March 2010. Foreclosure sales increased 92.3 percent from the prior year, when most major lenders had voluntary moratoriums in place while awaiting the implementation of the Administration's Home Affordable Modification Program (HAMP). Foreclosure sales increased 24.2 percent from February, with 79.2 percent of those going Back to Bank and the remainder Sold to 3rd Parties, primarily investors.

"Despite efforts to promote foreclosure alternatives like loan modifications and short sales, the simple reality is that there isn't a program for everyone" says Sean O'Toole, Founder and CEO of ForeclosureRadar.com. "Unravelling trillions in excess debt will take time, and foreclosure is part of the solution, not the problem."

Foreclosure Filings

Notice of Default filings dropped substantially in March from the prior year. Last year, filings reached record levels when lenders caught up on a backlog of filings after delays caused by new notice requirements introduced in California Senate Bill 1137.

Foreclosure Outcomes

3rd Party purchases at foreclosure sales hit a new record in March, crossing 4,000 properties for the first time with the combined purchases totaling more than \$840 Million. The increase in cancellations appears to be primarily driven by filing errors, as evidenced by an early cancellation or by statutory requirement as evidenced by the sale being postponed beyond the maximum time allowed under law. Still more than half of the 16,513 cancellations occurred mid-foreclosure indicating a likely loan modification or short sale.

Foreclosure Inventories

Our estimate of Preforeclosure Inventories is based on the number of Notice of Default filings, and the length of time between the filing of the Notice of Default and the Notice of Trustee Sale. This month the time between filings increased from 142 days to 188 days, pushing our Preforeclosure Inventory estimate up by 12.59 percent. Like February, properties exiting the foreclosure process nearly matched the number of new Notice of Trustee Sale filings, leaving the number of properties Scheduled for Sale flat. While the number of properties going Back to Bank jumped this month, so did the resale of Bank Owned properties, leaving REO inventories flat from February to March.

Foreclosure Discounting

The discount from market value that 3rd Parties, typically investors, received on foreclosure sales increased slightly in March. At just 15.8 percent below market value, it is likely that banks have hit the limits of what they can extract from investors given the risks of purchasing at trustee sale. For those properties that banks take back at foreclosure sale, the opening bid was an average 31.3 percent higher than market value, clearly removing any possibility of an investor purchase.

Foreclosure Timeframes

Foreclosure timeframes continued to increase slightly across the board, as banks continue to delay foreclosure, and slowing home sales increase Time to Resell. Time to Foreclose is likely to increase further in coming months, as the time to file a Notice of Trustee Sale has increased from 142 days to 188 days this month, a delay which will show up in the Time to Foreclose statistics as those properties are sold in coming months.

California Foreclosure Report Methodology

The data presented by ForeclosureRadar is based on county records and our observations of individual sales [results from daily trustee sale auctions](#) throughout the state – not estimates or projections*.

About ForeclosureRadar.com

ForeclosureRadar is the only web site that tracks every foreclosure in California with daily updates on all foreclosure auctions. ForeclosureRadar features unprecedented tools to [search, manage, track and analyze preforeclosure, foreclosure auction, short sale and bank owned real estate](#). The web site was launched in May 2007 by Sean O'Toole, who spent 15 years building and launching software companies before entering the foreclosure business in 2002 where he successfully bought and sold more than 150 foreclosure properties. ForeclosureRadar is an indispensable resource for real estate agents, brokers, investors, lenders, attorneys and other real estate professionals specializing in the California real estate market.
