

Trestle™

Real estate data at your fingertips

Are you a multiple listing organization supporting a multitude of subscribers and data relationships? A broker looking for unique content to give your website a competitive edge? Or maybe a technology provider coding the next killer app? **Then Trestle™ is for you.**

Trestle connects data sources and data recipients. Trestle simplifies, unifies, and transforms the national marketplace for property listings and other real estate data.

Who can benefit from Trestle?

Multiple Listing Organizations

It seems like *everyone* wants access to the listings in your database, including your broker subscribers, website and app developers, neighboring multiple listing organizations, real estate portals, and more. Trestle makes it easy to manage all your data relationships with security and precision—putting ultimate control at your fingertips. Your connections. Your data feeds. Your fees.

Technology Providers

Real estate data is the fuel that powers your technology, but it can be hard to get. Trestle breaks down barriers for technology providers so you can focus on what you're best at: innovation. No matter which multiple listing organization you get it from, all Trestle listing data follows the RESO data dictionary standard, so you never have to worry about field mapping or data transformation. If 100 organizations give you access to their listing information, you can get all their data in a single feed. Imagine that.

Real Estate Brokers

Being a successful real estate broker is a tough job, and it's not getting any easier. Online competition is fiercer than ever and managing your listing data can be a major headache—especially if you belong to more than one multiple listing organization. Trestle makes it easy to access and manage your listing data so you can put it to work for your brokerage any way you want.

“Over the past year, Homes.com has leveraged Trestle to help transition our legacy MLS feeds to the RESO Web API. Trestle’s data quality, timeliness, and premium support have been outstanding.”

Andy Woolley
Vice President, Industry Development, Homes.com
