# SHOWING FEATURES

Our showing features conveniently and quickly provide showing instructions, property details and how to contact the listing agent to help make your showings go smoothly.

Showing Information

Whether it's "Please remove your shoes," or "The alarm code is 1234," you now have showing instructions within the app. And, soon we will pull showing instructions directly into the app from your MLS. No more scribbling showing instructions on sticky notes – it's all in the app!

Listing Information

Why fumble with a bunch of papers? You have important information about the property such as number of bedrooms, baths, square footage and price, all at your fingertips. You can also click the Listing Details button to use our integration with partners like RPR, HomeSnap, HomeSpotter and Matrix to view more in-depth property details.

Manually Ending a Showing

This feature makes sure the listing agent and homeowners know when a showing has ended so the owners can return to their home. The showing agent simply clicks a button to indicate the end of the showing and a notification is sent. It's a simple but powerful feature that benefits everyone involved in the process.

For more information, visit our website at SentriLock.com or contact our Customer Support Team at 513-618-5800.
